

PCB design & Implementation - Internship

Days: 3 days

Duration: 15 Hrs

Day	Topics
1	Introduction to OrCAD product suite, OrCAD capture : Creation of Schematic diagram, Part Editor, Hierarchical Project creation
2	Introduction to PSpice: Creation of Simulation Profile, Analog and digital circuit simulation, Bias point analysis & Transient analysis.
3	Introduction to PCB Editor: Tool bars, Applying footprint to the components, Netlist creation, manual Placement of components, manual routing, creation of artwork file
